

Which License Do I Need?

CARCare is available in three (3) different licenses. The software functionality is the same across all three license options. The difference is software capacity.

Here are the three (3) licenses, with a brief explanation of the differences.

- **Home Edition – 10 Assets**

This is our most popular license. Most customers have two to three automobiles, and maybe a boat and/or a motorcycle. This license gives you room for those assets, plus some extra room to keep service records on various other types of power equipment that you might use around the home. Examples might include pressure washers, lawn movers, compressors, and string trimmers.

- **Collector Edition – 50 Assets**

Some of our customers collect automobiles. This license gives you much more room to accommodate up to fifty (50) cars and/or pieces of equipment. So there is a great deal of room to grow with the Collector Edition.

- **Premium Edition – Unlimited Assets**

This license would be appropriate for small to mid-sized business that have more than 50 vehicles and/or pieces of power equipment.

If you are managing a business fleet and need more sophisticated features, have a look at our FLEETMATE® product at www.fleetmate.com. FLEETMATE® is powerful, professional, business-oriented fleet maintenance management software with the features that you need to manage your fleet.
